

Chemgene HLD4.

PRODUCT CHANGE NOTICE

Chemgene HLD4 is changing to Chemgene MEDLAB

BENEFITS OF THE CHANGE

- Wider bacteria testing, including ESKAPE organisms particularly important for healthcare settings – 1% dilution and 5 mins contact time maintained
- Additional testing (not previously covered by HLD4) eg. Legionella, Candida auris
- Bacteriophage: reduced dilution rate from 10 % to 1 %, with contact time maintained
- Enveloped viruses. Far greater range of testing and dilution rate reduced from 2 % to 1 % with contact time standardised to 10 mins
- Non-enveloped viruses. Dilution rate maintained, with slight increase in contact time for Norovirus
- Fungi Aspergillus result allows read across all fungi and contact time reduced to 10 mins

See our new [Chemgene MEDLAB flyer](#) for more information.

If you require an in-depth discussion on this product change, please contact your Account Manager.

WHY IS CHEMGENE CHANGING?

- To transition to new technology in preparation for new BPR regulations
- More testing to higher medical standards, instead of domestic test standards
- Strengthen claims already set using updated, more stringent medical test methods
- Branding update to reflect market-leading positioning and innovation

Economical dilution rates from 1%

General cleaning & disinfection: 1%
High risk & biohazard conditions: 10%
