

## Serological Pipettes

### Product Highlights

- Accuracy  $\pm 2\%$
- Bidirectional graduations provide added applicability
- Non-cytotoxic and non-haemolytic USP Class VI polystyrene
- Gamma sterilized to SAL  $10^{-6}$  (ISO11137)
- Certified RNase, DNase, latex and pyrogen free
- Colour-coded for easy identification
- Negative graduations (excl. 100 ml) allows additional working volume
- Supplied with a polyolefin filter plug
- Individually wrapped in traceable paper-plastic peel-back packs showing lot number and expiry date
- Specially designed carton with perforated tear-strip doubles as efficient, bench top dispenser
- ISO 9001 and ISO 13485 manufactured

## Product Applications

Serial dispensing of aliquots of different volumes

Resuspension of bacteria or cell pellets and nucleic acid precipitates

Aspiration of cell layer from, e.g., Ficoll® gradient

Phase extraction and removal of lower phases

## More informations about Serological Pipettes

### Discover the possibilities!

STARLAB's new extended range of Serological Pipettes cover seven different volumes and, for the first time, includes a 100 ml pipette. The pipettes are constructed from polystyrene for sterile serological and tissue culture applications. Colour-coding on both the pipettes and the packaging provides easy identification. The black printed, easy to read ascending and descending graduations simplify fluid measuring and dispensing, and all pipettes (excl. 100 ml) feature negative graduations for extra working volume. Perfect for use with all popular pipette controllers, including ErgoOne® FAST.
