Loops

Product Highlights

- Combination needle/loop provides choice to spread or pick colonies and cultures
- Transfer bacterial cultures without risk of contamination
- Lot to lot traceability
- Use loop end to uniformly streak a gel surface
- Use needle end for removal of colonies

Product Applications

Microbiology

More informations about Loops

Time-saving, particularly for extensive test series. Disposable, sterile inoculation loops are easy to use and provide superior safety. The combination of the needle on one end and the loop on the other provides the choice for the removal of colonies (needle end) or to uniformly streak a gel surface with the loop end.
