

## Syringe Filter, Cellulose Acetate (Sterile)

### Product Highlights

- High bubble point membrane provides tighter pore size for greater security
- High burst pressure ensures safe operation
- Large filtration surface area allows you to filter your sample more easily
- Low hold-up volume provides maximum recovery of your solution
- Surfactant-free membrane for cleanliness in downstream applications
- Filter type printed on the filter for ease of identification
- Convenient, larger pack sizes
- Gamma sterilised (SAL 10<sup>-6</sup>)

## Product Applications

0.22 µm membranes for sterilization, sterility testing, “final filtration”

0.45 µm membranes for analysis of bacteria, sterility testing, clarification and prefiltration
