More informations about Distel Dosing System

The new-style disinfectant system to replace wipes! Take advantage of this new system where you can use any cloth/towel and dose it with the amount you need. Distel DS is a convenient and easy to use surface disinfectant for the cleaning and disinfection of hard surfaces and non-invasive medical devices. Simply diilute 1 litre of concentrate with tap water to make 10 litres of disinfectant that is effective against bacteria, yeast and viruses in just 3 minutes! The clever dosing head on the bottles ensures a consistent 5.0 ml dose of disinfectant every time. A starter pack is available that contains all you need to get going (1L disinfectant concentrate and empty reusable dosing bottles); you can then purchase the 1L concentrate on its own as and when needed. It's easy, green and results in less plastic waste. Eliminate single-use plastic wipes now with Distel DS - just dilute, dose and wipe using a towel or cloth of your choice.
