

## Cryogenic Vials with External Thread, Self-Sealing Cap

### Product Highlights

- External Threaded Tube / Self-Sealing Cap
- White writing area and highly visible black graduations at 100  $\mu$ l increments
- Sterile (SAL 10- $\square$ )
- Certified RNase, DNase, DNA, PCR inhibitors and Endotoxin free
- Cap can be colour-coded using the coloured cap inserts

## Product Applications

Storage and transportation of biological material

Ideal for vapor-phase liquid nitrogen freezing (Not suitable for immersion)

## More informations about Cryogenic Vials with External Thread, Self-Sealing Cap

Starlab's Cryogenic Vials have been developed for the storage and transportation of biological material.

- › Made from 100 % polypropylene
- › For storage down to -196 °C; should only be used in the gas phase of liquid nitrogen
- › White writing area and highly-visible black graduations at 100 µl increments
- › Sterile (SAL 10-6)
- › Certified RNase, DNase, DNA, PCR Inhibitor and Endotoxin free
- › The internal threaded vials with a silicone seal in cap provide the highest possible impermeability
- › The skirted vials lock into racks for easy single-handed work
- › Caps can be colour coded with the Coloured Cap Inserts
