

Plate Sealing

Product Highlights

- Provides a secure seal
- Use for short-term storage, incubation and containment of biohazards
- 50 µm clear polyester seal with acrylic adhesive
- White poly-coated paper release liner
- Suitable for ELISA, EIA and similar assays
- Eliminates the edge effect in sensitive ELISA assays
- Temperature range: -40°C to 120°C
- Dimensions: 146 x 79.4 mm

Product Applications

Plate Sealing
Suitable for ELISA, EIA and similar assays
Eliminates the edge effect in sensitive ELISA assays
Use for short-term storage, incubation and containment of biohazards

More informations about Plate Sealing

A sterile and non-sterile variant of self-adhesive, clear polyester film which is suitable for ELISA, EIA and similar assays. Manufactured from 50 µm polyester, these non-piercable seals provide a secure seal for every well to eliminate edge effects in sensitive ELISA assays. Also suitable for use with Tissue Culture plates for short-term storage, incubation, and containment of biohazards.
