More informations about Chemgene MEDLAB Surface Disinfectant Wipes

Chemgene MEDLAB multi-surface disinfectant delivers a new, unique formulation designed with laboratory, forensic and healthcare settings in mind.

The combination of active substances in Chemgene MEDLAB ensure that equipment and medical care environments can be routinely cleaned and disinfected to a consistently high standard, with less risk of antimicrobial resistance. The wipes provide rapid disinfection in 60 seconds, and surfaces do not require rinsing following disinfection making the process quick and easy.

PRODUCT FEATURES

- › Each wipe disinfects 1m²
- › Plastic-free, fully biodegradable plant-based substrate
- › Effective against MDR pathogens
- › Non-corrosive
- › Biodegradable ingredients
- › Alcohol & chlorine free
- › No rinsing required

Chemgene MEDLAB Multi-Surface Disinfectants are suitable for the cleaning and disinfection of a variety of surfaces, instruments and equipment against bacteria, yeast, fungi, enveloped viruses, adenovirus and bacteriophage. While traditional surface wipes have provided users with a convenient application of disinfectants, the efficacy of the formulation combined with the substrate is often overlooked, resulting in poor performance and increased risk. Extensive research and development ensure that Chemgene MEDLAB wipes will always perform as they should.

Use in the laboratory for protection from pathogenic microorganisms, in healthcare settings for protection against multi-drug resistant pathogens and forensic settings for protection from cross-contamination.

Chemgene MEDLAB multi-surface disinfectant is compliant with regulations in the UK and EU including the Biocidal Products Regulation (BPR), Classification of Labelling and Packaging (CLP) and Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) regulations.
