

## Rigid Frame PCR Plates

### Product Highlights

- Polycarbonate rigid frame provides precise handling for automated systems
- Polypropylene, ultra-thin wells ensure optimal heat transfer and high reaction efficiency
- Well ridges help prevent sample evaporation when sealed with films, foils or cap strips
- White printed matrix
- Certified RNase, DNase, DNA & PCR Inhibitor free
- Supplied in a resealable bag, in a box

## Product Applications

PCR

## General Data

Art. No.	See variations
Pack Size	10 Plates (1 Box x 10 Plates)
Sterile	No
Autoclavable	No
Material	Polycarbonate
DNA free	Yes
DNase free	Yes
PCR inhibitor free	Yes
RNase free	Yes
Elevated wells	no
Suitable for PCR	yes
Suitable for Real-Time PCR (qPCR)	yes

## More informations about Rigid Frame PCR Plates

Starlab's rigid frame PCR plates will provide seamless integration with your automated systems. The durable polycarbonate frame provides a stable, flat surface, which can withstand the firm grip of robotic arms, ensuring precise placement and eliminating any risk of misalignment, thanks to its SBS footprint and well spacing.

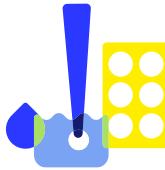

The wells are made from ultra-thin polypropylene to deliver exceptional thermal transfer for high reaction efficiency. The innovative well ridges are designed to prevent sample evaporation when sealed with films, foils, or cap strips, guaranteeing the integrity of your results.

Packaged in convenient, resealable bags to minimize contamination, Starlab's rigid frame PCR plates are certified free of RNase, DNase, DNA, and PCR inhibitors.

Elevate your automated PCR procedures with Starlab's Rigid Frame PCR plates, optimised for precision and reliability.
