

X-Tracta™ Gel Extraction Tool

Product Highlights

- High accuracy and precision
- Rapid, four-step process
- One-handed operation
- No risk for cross-contamination
- Easy to use
- High yield recovery
- Low failure rate

Product Applications

Extraction of DNA and RNA bands from agarose gels following gel electrophoresis.

More informations about X-Tracta™ Gel Extraction Tool

Perform DNA and RNA sample extractions with great accuracy and precision in a rapid, four-step process. The disposable polyethylene tool cleanly cuts and picks up uniform slices of gel, eliminating possible cross-contamination from razor blades and other gel-cutting methods. Simply stated, the superior cutting edge of the X-Tracta™ [Gel Extraction Tool](#) along with its easy, one-handed operation means that it performs better than any other gel extraction solution currently available.
