More informations about Silicone Sealing Mat for 96-Well PCR Plate

Reusable, ultra-flexible silicone sealing mat for 96-well PCR Plates. Designed to be especially suitable for thermal cyclers with pressure-fit lids. Can be cut to size for use with 24, 32 or 48-well plates. The non-reactive rubber will withstand repeated autoclaving, extreme temperatures and aggressive chemicals.

For best results we recommend using only the dedicated mat for your plate. The recommended sealing mat is listed in the ordering table under each plate.

NOTE: Sealing mats are not suitable for Realtime-PCR (qPCR) applications.
