More informations about Clear Polypropylene Seal (PCR)

Optically-clear polypropylene sealing for PCR with pressure-sensitive polyacrylate adhesive. The seal is non-piercable, and has high solvent resistance. Can be used for standard PCR and short-term storage. The film is peelable, providing residue-free removal with readhesion possible. Use with photometer plate readers up to 276nm.

Suitable for use with all plate material types. The use of a seal applicator is advised; strength of sealing is dependant on application pressure.
